

Daffodil International University
Faculty of Science & Information Technology
Department of Computer Science and Engineering
Mid Examination, Spring 2025
Course Code: CSE414 Course Title: Web Engineering
Level: 4 Term: 2 Batch: 60

Time: 1:30 Hrs

Marks: 25

Answer ALL Questions

[The figures in the right margin indicate the full marks and corresponding course outcomes. All portions of each question must be answered sequentially.]

1.	a)	A software development team has just completed building a new web application. Before the app is launched, the team performs various checks to ensure that all features are functioning as specified in the project requirements, such as the login feature and search function. They also test whether the app is compatible with different devices and operating systems. Based on the scenario, describe the difference between verification and validation in the web app development process.	[3]	CO2																						
	b)	During the development of a new website, the team follows a structured approach to ensure the site is free of defects, conducting various tests at different stages, from initial development to post-launch updates. Based on your understanding, demonstrate how many stages of testing are involved in the website development process.	[3]																							
	c)	A company is planning to deploy a large-scale application across multiple servers and locations to improve performance and fault tolerance. They are exploring various options for structuring the system to support this distributed setup. What types of distributed systems are you familiar with, explain the benefits of each.	[4]																							
2.	Nexora Tech is managing an online store that sells various tech products. They need to create a table to display product details, including the product ID, name, price, and availability information while organizing the data with clear rows and columns. Considering their needs construct the following table using proper HTML, and CSS code.			[7]																						
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th rowspan="2">Product ID</th> <th colspan="2">Product Information</th> <th rowspan="2">Availability</th> </tr> <tr> <th>Name</th> <th>Price</th> </tr> </thead> <tbody> <tr> <td rowspan="2">101</td> <td>Smartphone</td> <td>\$799</td> <td rowspan="2"> <ul style="list-style-type: none"> In Stock Available Online </td> </tr> <tr> <td>Smartphone Pro</td> <td>\$999</td> </tr> <tr> <td>102</td> <td>Laptop</td> <td>\$1299</td> <td> <ul style="list-style-type: none"> In Stock Available in Stores </td> </tr> <tr> <td rowspan="2">103</td> <td>Tablet</td> <td>\$499</td> <td rowspan="2"> <ul style="list-style-type: none"> Limited Stock </td> </tr> <tr> <td>Tablet Pro</td> <td>\$649</td> </tr> </tbody> </table>					Product ID	Product Information		Availability	Name	Price	101	Smartphone	\$799	<ul style="list-style-type: none"> In Stock Available Online 	Smartphone Pro	\$999	102	Laptop	\$1299	<ul style="list-style-type: none"> In Stock Available in Stores 	103	Tablet	\$499	<ul style="list-style-type: none"> Limited Stock 	Tablet Pro	\$649
Product ID	Product Information		Availability																							
	Name	Price																								
101	Smartphone	\$799	<ul style="list-style-type: none"> In Stock Available Online 																							
	Smartphone Pro	\$999																								
102	Laptop	\$1299	<ul style="list-style-type: none"> In Stock Available in Stores 																							
103	Tablet	\$499	<ul style="list-style-type: none"> Limited Stock 																							
	Tablet Pro	\$649																								
3.	<p>A university is developing an online registration system for students. Before submitting the form, the system should validate the following: the Name must be at least 3 characters long, the Email must follow a valid format, the Password must be at least 6 characters long, and the Confirm Password must match the Password. Write JavaScript code to apply input validations and display appropriate error messages for each invalid entry.</p> <div style="border: 1px solid black; padding: 10px; margin-top: 10px;"> <p>Name: <input style="width: 150px;" type="text"/></p> <p style="font-size: small;">Name must be at least 3 characters long</p> <p>Email: <input style="width: 150px;" type="text"/></p> <p style="font-size: small;">Please enter a valid email address</p> <p>Password: <input style="width: 150px;" type="password"/></p> <p style="font-size: small;">Password must be at least 6 characters long</p> <p>Confirm Password: <input style="width: 150px;" type="password"/></p> <p style="font-size: small;">Confirm Password must match Password.</p> <p style="text-align: center;"><input type="button" value="Submit"/></p> </div>			[8]	CO3
